

WBSF 2 STAGE COMBO

WOVEN BELTED SILT FENCE (WBSF)

REINFORCED SILT FENCE

Part# WBSF2CB

Combines 2-Stage silt fence with a high visibility delineation top in one fence. Installing one fence to do two jobs saves money!

- Internal belts used as attachment points allow fabric to hold maximum loads without additional reinforcement - provide linear support to disperse weight of stormwater and sediment over the full system.
- Enhanced durability reduces cost associated with replacement and repairs
- The first stage above ground line is the high efficiency 50 sieve sediment retention stage
- 2 Stage technology reduces the potential for overtopping and undermining:
 - Stage 1 – Sediment retention (50 sieve, >80 gpm/ft² clear water flow)
 - Stage 2 – Stormwater release (>300 gpm/ft² clear water flow)

Structural Integrity – Stormwater Release – Sediment Retention
