

SS 300 CURB INLET FILTER

Curb Inlet Protection

Use multiple SS 300s for large inlet openings
Create adjustable weir with ends containing sand or stone bags.

SS 300 Curb Inlet Filter filled with pine straw.

Upon request Silt Saver will supply at no additional cost.

- 2 sandbag inserts
- Zip ties

Single SS 300s for 5' inlet opening
Use of center weir recommended

Structural Integrity – Stormwater Release – Sediment Retention

- Pine straw wrapped in high flow-high visibility polyester green mesh with pockets for sand / stone weighted bags on each end that can create a weir as needed
- Biodegradable core materials offer an environmentally friendly alternative to recycled rubber / wire materials that can pollute waterways
- Pine straw filling maintains shape and resists absorption of storm water / molding / compaction.
- Flexible, light weight for easy shipping, hauling and installation.
