

UNDER GRATE SEDIMENT BAG

Sediment Collection

Available Sizes

18"x36", 21"x29", 24"x24", 24"x36", 24"x48", 27"x27", 28"x36", 36"x36", 36"x48", 40"x55"

Designed for under grate sediment collection

- Filters sediment and construction debris out of stormwater to reduce costly basin and pipe system cleaning
- 40 sieve woven polypropylene geotextile allows water filtration and sediment retention
- Built in overflow ports prevent flooding during rain events
- UV resistant, durable and reusable
- Handles and load supporting harness for easy installation / removal / cleaning and replacement
- Hangs unobtrusively under stormwater grates – does not impede traffic above
- High visibility green edging is easily seen by workers and inspectors to show sediment protection in place
