

WBSF™ STANDARD

Woven Belted Silt Fence (WBSF™)
REINFORCED SILT FENCE
Part# WBSFSD

WBSF™ System

Five
>350 lb. tensile
strength belts woven
into the fabric

Structural Integrity – Stormwater Release – Sediment Retention

- Tough woven polypropylene geotextile that delivers consistent performance
- Internal belts used as attachment points allow fabric to hold maximum loads without additional reinforcement
- **Replacement for wire back silt fence**
- Belts provide linear support to disperse weight of stormwater and sediment over the full system.
- Enhanced durability reduces cost associated with replacement and repairs
